Learn to Interpret and Conduct Rotation Methods in R With Data From the Northern Ireland Life and Times Survey (2014)
Learn to Interpret and Conduct Rotation Methods in R With Data From the Northern Ireland Life and Times Survey (2014)

About This Dataset

Data source citation

Full title of originating dataset

Northern Ireland Life and Times Survey, 2014: Dementia Teaching Dataset

Data author(s) and affiliations

Devine, P., Queen's University of Belfast. School of Social Sciences, Education and Social Work

Perceptive Insight

Atlantic Philanthropies

Lizanne Dowds

Gillian Robinson

Ann Marie Gray

UK Data Service
Dataset source website address

https://discover.ukdataservice.ac.uk/catalogue/?sn=8149&type=Data%20catalogue

First publication date

27 February 2017

Data Universe

National

Northern Irish adults

Adults aged 18 or over, living in private households in Northern Ireland during 2014

Funding sources/suppliers

Access Research Knowledge (ARK) Northern Ireland

Sample/sampling procedures

One-stage stratified or systematic random sample

Time frame of analysis

September–December 2014

Unit of analysis

Individuals

Location covered by data

Northern Ireland
Other sources

List of variables

*C7a. And what about someone who has had dementia for a long time. Do you think in most cases they should … continue to live alone?*

Likert scale ranging from 1 (Definitely) to 5 (Definitely Not) measuring respondents views towards the above question.
