Learn to Use the Difference of Means T-Test in SPSS With Data From the British Crime Survey (2007–2008)
Learn to Use the Difference of Means T-Test in SPSS With Data From the British Crime Survey (2007–2008)

About This Dataset

Data Source Citation

Full title of originating dataset

Data author(s) and affiliations

University of Manchester. Cathie Marsh Centre for Census and Survey Research. ESDS Government

Dataset source website address

http://discover.ukdataservice.ac.uk/Catalogue/?sn=6891&type=Data%20catalogue

First publication date

10 November 2011
Data Universe

National

Funding sources/suppliers

Economic and Social Research Council Higher Education Funding Councils. Joint Information Systems Committee

Sample/sampling procedures

Multi-stage stratified random sample

Weighting

Weighting used. See documentation for details.

Data collection dates

April 2007–March 2008

Time frame of analysis

Cross-sectional (one-time) study The BCS is an annual cross-sectional study, but this teaching dataset has been compiled using only data from the 2007-2008 survey.

Unit of analysis

Individual

Location covered by data

England and Wales
Other sources

The data are taken from the British Crime Survey, 2007-2008, which is available from the UK Data Archive under SN 6066.
