

# Assignment:

## Discovering Ethnographic Research

Using the **SAGE Research Methods** database, research ethnography as a methodology. Find two different approaches to ethnographic research (e.g. participatory research versus field work). Find articles by researchers about your selected approaches in the **SAGE Research Methods** database. Compare and contrast the experiences of your selected researchers. Address the following points in a one-page, double-spaced paper and address the following points:

1. How did the researchers go about their work?
2. What are examples of challenges for each researcher's approach?
3. What are some strengths of each approach?
4. Which approach would you use? Why would you choose one approach over the other?
5. Give examples of a research problem that are best suited for each approach and explain your rationale.
6. Provide APA citations for the works you are referencing.
